PRECISE DISTANCE MEASUREMENT

A Perfect Companion at Every Range

Introducing Canon's new golfing essential, the PowerShot GOLF. Strategise and refine each round with precise measuring features, record and playback to review your performance. Set your sights further, tee off with confidence.

Strategise with Pinpoint Accuracy

Landing your golf ball in hilly areas can be a head scratch for your next swing. When playing on hilly or sloping terrain, enabling 'Slope Mode' will give you a more accurate calculation of the effective distance that the ball must travel (horizontal distance \pm height) based on the fairway's slope and distance to the target. This comes in useful for making strategic decisions such as golf club selection and adjusting the strength of your swing.

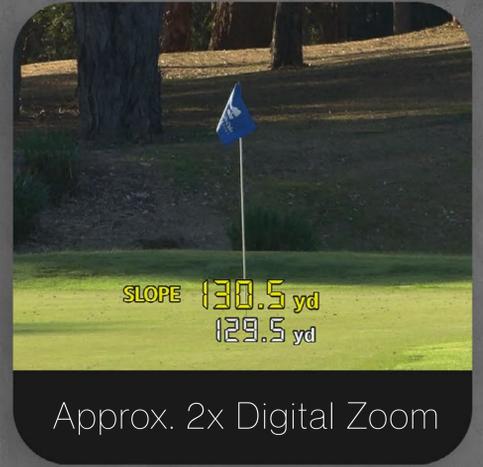

Effective distance that the ball must travel (horizontal distance \pm height) with Slope Mode **ON**

Straight-line distance to target

Without Digital Zoom

Approx. 2x Digital Zoom

◎ Zoom In on Faraway Targets

With a Digital Zoom magnification of up to 2x, distant objects like pins and flags from 7 to 800 yards can be viewed in detail — providing a way to effortlessly locate balls after making a shot or observe nearby conditions. The function can also be used while recording videos or capturing still images.

◎ Stabilised Visuals

Equipped with lens-shift type image stabilisation, camera shakes are now reduced, which allows clearer and sharper visibility through the viewfinder even when identifying faraway targets.

◎ Vibration Function

Get notified in an instant. When the 'Vibration Function' is turned **ON**, the PowerShot GOLF will vibrate in your hands, indicating the range-finding process is complete.

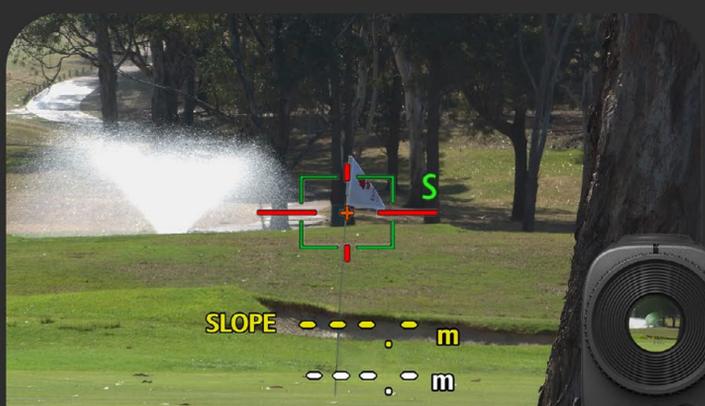

Pin-Locking Function

◎ Pin-Locking Function

Lock onto the right flag. The PowerShot GOLF will automatically target the nearest subject and measure the distance to it when multiple subjects are in frame. A 'flag' icon will appear once the subject is confirmed.

Continuous Range-Finding

◎ Continuous Range-Finding

Identify your desired subject and measure its distance with ease. By half-pressing the 'Measurement' button, the viewfinder will display an 'S' icon as it fires off a constant laser. Then, a 'flag' icon will appear after a specific subject is detected with the 'Pin-Locking Function' before displaying the measured distance data.

IMAGE & VIDEO RECORDING

Measuring Distances and Recording Playbacks

Improve your performance with range-finding data

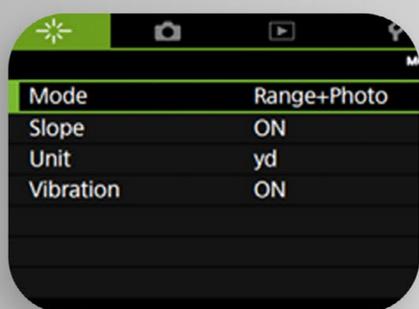

Review your game easily using the PowerShot GOLF. The device allows for the recording of photos and video clips that contain measured distance data, offering you a multitude of ways to assess information to improve your game afterwards. Audio recording is possible with the PowerShot GOLF too.

3-Step Recording and Measuring

Perform measurements and record your performance easily in 3 steps

- ⦿ **Step 1** Set the PowerShot GOLF LASER lever to **ON**.

- ⦿ **Step 2**
- Selecting 'Range' allows you to measure only the distance.
 - Selecting 'Range + Photo' allows you to perform measurements and capture images.

- ⦿ **Step 3**
- i. Pressing measurement button halfway:**
Viewfinder measures and displays distance.
 - ii. Pressing measurement button down fully:**
A still photo containing recorded distance data is taken.
 - iii. Pressing measurement button down halfway while video recording:**
Distance data will be recorded within the video.

OPERABILITY

Pocket-Sized Precision

Fitting easily into any pocket or golf bag, measuring distance is effortless, or simply review your last performance on the go. USB-C charging allows for quick charges between games.

Easy Operations

Buttons and switches are ergonomically placed for easy accessibility. Protected by IPX4 equivalent exterior, have peace of mind outdoors with robust build quality.

Clear User Interface

Take sight of the next bound with ease. Toggle between multiple useful information at a glance through the high resolution viewfinder. Intuitive icons and prompts confirm subject is in focus and display useful distance measurements.

* Disclaimer: Rain may prevent the device from accurately measuring the distance to the target.

SPECIFICATIONS

Minimum/Maximum range-finding distance	7.0 - 800 yards. (6.4 - 732m)	
Image sensor	1/3 type CMOS Effective pixel count: 11 megapixels	
Image recording	Available for photo and movie	
Focal length	410mm (35mm image sensor equivalent)	
	820mm (2x Digital Zoom)	
Aperture	f/3.9	
Water resistance	IPX4 equivalent	
Image stabiliser	Lens-shift system	
Slope correction	Available	
Viewfinder system	0.39 inch OLED (2.36 million dots)	
Magnification rate	6x (410mm)	12x (820mm)
Vibration feature	Available	
Battery	Built-in rechargeable lithium-ion battery	
Recording media	MicroSD / MicroSDHC / MicroSDXC memory cards (UHS-I compatible)	
Terminal type	USB Type-C	
Body size (W x H x D)	Approx. 31.0 x 58.9 x 91.2 mm	
Weight	151g (including memory card)
