#### **SECTION 4** FIRST AID MEASURES

## **First Aid Measures:**

## Inhalation:

If symptoms are experienced, move victim to fresh air and obtain medical advice.

### **Ingestion:**

Rinse mouth. Drink 1 or 2 glasses of water. If irritation or discomfort occurs, obtain medical advice immediately.

## Eye:

Do not allow victim to rub eye(s). Flush with lukewarm, gently flowing water for 5 minutes or until particle is removed. If irritation persists, obtain medical attention.

### Skin:

Wash with soap and water. If irritation persists, obtain medical advice.

### Note to Physicians:

None

|  | k as a Group 2B carcinogen, for which there is inadequate human evidence, but atter is based upon the development of lung tumors in rats receiving chronic |  |
| inhalation exposure to powdered carbon black at levels that induce particle overload of the lung. However, there |  |  |
| is a two-year inhalation study of a toner containing carbon black which demonstrated no association between      |  |  |
| toner exposure and tumor development in rats.  |  |  |

## **Others:**

Chronic effects:

Muhle et al. reported pulmonary response upon chronic inhalation exposure in rats to a toner enriched in respirable-sized particles compared to commercial toner. No pulmonary change was found at 1 mg/m<sup>3</sup> which is most relevant to potential human exposure. A minimal to mild degree of fibrosis was noted in 22% of the animals at 4 mg/m<sup>3</sup>, and a mild to moderate degree of fibrosis was observed in 92% of the animals at 16 mg/m<sup>3</sup>. These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval.

## Method of Disposal:

DO NOT put toner or toner container into fire; heated toner may cause severe burns. DO NOT shred a toner container, unless dust-explosion preventing measures are taken. Finely dispersed particles form explosive mixtures in air. Disposal should be subject to federal, state and local laws.
