

# High Volume, Ultra Low Cost Colour Printing for Small Businesses

## Simple Ink Refill & Maintenance

Ink refill made easy—simply invert the ink bottle without the need to squeeze. Once the tank becomes full, the ink flow and receptacles on both bottles and ink tanks prevent any removable colour

The maintenance cartridge also makes

# One Printer, **Multiple Possibilities**

of print media such as sticker papers, banner papers and window envelopes. point-of-purchase displays PosterArtist (web).

### **High-Density Pigment Inks**

The high-density pigment inks produce highlighter and water-resistant.\*

### Specifications are subject to change without notice.

- Ink droplets can be placed with a pitch of 1/4800 inch at minimum.
- Document print speeds are the averages of ESAT (Word, Excel, PDF) in Office Category Test for the default simplex mode, ISO/IEC 24734.

Photo print speed is based on the default setting using ISO/JIS-SCID N2 on Photo Paper Plus Glossy II and does not take into account data processing time on host computer.

Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used, etc

- Operation can only be guaranteed on a PC with pre-installed Windows 7 or later.
- Page yields may vary depending on content coverage, print settings, temperature, humidity, and frequency of printing.
- Declared yield value is the estimated value based on Canon individual test method using the ISO/IEC 24712 colour chart and continuous printing simulation with the replacement ink bottles after initial setup
  - The colour yield is based on 1 set of composite colour bottles.
- The Economy mode reduces the ink consumption by lowering the density. More pages can be printed using this mode.
- \*\* Based on testing performed in accordance with ISO1179:2000 information and documentation standard - Permanence and durability of writing, printing and copying on paper. This feature is not guaranteed in all cases

NOTE: All printers work in Operating Environment of Temperature: 5 - 35  $\,$  C; Humidity: 10 -90% RH (no dew condensation). The performance of the printer may be reduced under certain temperature and humidity conditions. All printers work in Storage Environment of Temperature 0 - 40  $\,$  C; 5 - 95% RH (no dew condensation). For the temperature and humidity conditions of papers such as photo paper, refer to the paper's packaging or the supplied instructions.
